

iSURE

International Summer Undergraduate Research Experience

The iSURE program provides opportunities for international undergraduate and Master's students to participate in research projects at the University of Notre Dame. Students will gain valuable, hands-on experience and exposure to real-life scientific problem solving and learning by working closely with faculty and graduate students on a variety of cutting-edge projects.

The iSURE program is open to all international students who are enrolled as undergraduate or Master's students in a university outside the U.S. or to international students enrolled as full-time undergraduates at a U.S. university. Housing is provided for all iSURE students throughout the program, and several activities and events are offered to engage the iSURE cohort with other summer students. Some signature events are:

- Face-to-face Q&A sessions with Graduate Admissions Committee of certain departments
- Local cultural activities and excursions: baseball game, beach trip
- Evening events: speed-friending, scavenger hunt, ice-skating, trivia, etc.
- Professional development seminars and workshops
- Interaction and discussion with Notre Dame undergraduate students

The University of Notre Dame is consistently ranked among the top 20 universities in the United States.
